### **Academic Integrity Declaration**

In submitting this work, I agree that:

- The assessment has been produced by me and is solely my work, UNLESS the work is for a designated collaborative (group) task.
- I have not sought or received unpermitted assistance from any other person, or other source (e.g. a website, tutorial or answer service).
- I have properly acknowledged all sources used in my work.
- I have not unfairly represented content created by artificial intelligence or generative artificial intelligence tools as my work (the use of AI tools in assessed work must be expressly permitted by Course Leads and its use acknowledged).
- This work has not previously been submitted by me for any assessment task, OR I have received approval to resubmit this work.
- I did not use any other unfair means to complete this work.
- I am aware that AUT may use text-matching software to check for plagiarism in assessments.

For guidance on academic integrity please visit the referencing page of <u>Your library</u> (<a href="https://canvas.aut.ac.nz/courses/7624/pages/referencing">https://canvas.aut.ac.nz/courses/7624/pages/referencing</a>) on Canvas.

Deadline: Wednesday, June 5, 2024 at 11:59pm

#### Submission requirements:

You need to submit a source file (Rmd or Qmd), the corresponding PDF file, and any supplementary files (e.g. datasets).

#### **Useful Links & Tips**

- R Markdown and Quarto see Additional Resources (https://canvas.aut.ac.nz/courses/17750/pages/additional-resources?wrap=1)
- Video about Data Sources

10/05/2024, 18:02 Project

### Week 6: Data Sources

- Writing Statistical Questions
  - Video about Statistical Questions <a href="https://www.khanacademy.org/math/statistics-probability/designing-">https://www.khanacademy.org/math/statistics-probability/designing-</a> studies/statistics-overview/v/statistical-questions = (https://www.khanacademy.org/math/statistics-probability/designingstudies/statistics-overview/v/statistical-questions)
  - Examples COMP824\_writing\_research\_questions.pdf (https://canvas.aut.ac.nz/courses/17750/files/5227790?wrap=1)\_ 🔱  $(https://canvas.aut.ac.nz/courses/17750/files/5227790/download?download\_frd=1)\\$
- If your dataset is HUGE and your code is taking a long time to run, then you can take a random sample using the slice\_sample command. e.g.

slice\_sample(mpg, n = 10)

Statistical Models/Methods - see this document for suggestions (https://canvas.aut.ac.nz/courses/17750/files/5227670?wrap=1) (https://canvas.aut.ac.nz/courses/17750/files/5227670/download?download\_frd=1). Techniques not on the list need lecturer approval.
